

## Train Performance Report - Management Summary

Time period: Report displays the performance during last 12 from months, from report time period: 2020-03

---

Trains included in the report: Only trains running on PAPs on RFC 9 are considered in the report.

---

Punctuality threshold: Trains with delay equal or lower than 30 minutes are considered as punctual.

---

### Punctuality development

For calculation of punctuality, only those trains were considered, for which the delta time value for relevant location was delivered to RNE TIS system. The exact amount of trains considered for punctuality calculation can be seen in the graphs ([green columns](#)).

Punctuality development ([blue line](#)) is calculated in percentage for each direction, for the last 12 months from report time period. It is calculated separately for the following locations:

- Real origin: Real origin is the location, where train run has started (first point for which the timetable information was delivered to TIS)
- Final destination: Final destination is the location, where train run has ended (last location in train run, for which the timetable information was delivered to TIS)
- RFC origin\*: As RFC origin only those real origins are considered, which are within the network of IMs belonging to RFC.
- RFC destination\*: As RFC destination only those final destinations are considered, which are within the network of IMs belonging to RFC.
- RFC Entry: RFC entry is the location, where the train first enters onto RFC line (first point in the train run belonging to RFC)
- RFC Exit: RFC exit is the location, when the train last time leaves RFC line (last point in the train run belonging to RFC)

## Amount and Distribution of Delays over period of 13 months

The graphs below display the total amount of delay minutes reported to TIS (represented by the total height of the column) for all trains running on RFC per direction during last 12 months from the report time period. The different color sections of columns represent the share of responsibilities for these delays.
